WHAT I BRING TO A BOARD

- **Operator at scale.** General Manager of a \$400M P&L and a 350-person organization at Change Healthcare, the largest US healthcare clearinghouse, running \$160B in annual payment volume. Built an \$8B virtual card operation from a legacy print-and-mail remittance business and drove \$80M of net-new revenue in 18 months. At Finexio, scaled from zero to \$20M ARR and \$12B+ in annual payment volume on a multi-bank orchestration platform, backed by \$75M raised from JPMorgan and other institutional investors.
- **Institutional exit.** \$300M WellPoint acquisition of American Imaging Management (2007), where I was an operator pre-acquisition.
- **Regulated environments.** HIPAA, healthcare payments, patient liability, and the rules that govern them. Participant in the Federal Reserve Remittance Coalition from 2013 to 2017.
- **AI-native product perspective.** Three books on agentic payments published 2024 to 2026. Useful for boards separating signal from theater on AI strategy.

GOVERNANCE PERSPECTIVE

Technology / AI

Where the AI roadmap depends on a defensible data layer, not a foundation-model wrapper. Useful where the question is build vs. buy.

Audit

Operating exposure to regulated payment processing and HIPAA-grade data controls at multi-billion-dollar scale.

Strategy and value creation

An institutional exit and infrastructure-driven value creation, with direct experience translating data assets into durable operating value.

Compensation (with limits)

Operator perspective on technical executive comp. Defer to comp specialists on broader pay philosophy.
